Skeletal Outline Example

Use this outline to take notes for the module on _____.

Each resource in this module is designed to support your learning of one or more of the module learning objectives. Refer to the module overview and write down the learning outcomes below. Keep these objectives in mind as you engage with the module activities and assignments to help you focus on what is most important.

Learning Outcomes
1.
2.
3.

Microlecture

- What was the topic of this microlecture?

- In your own words, explain what you learned.

- What, if anything, are you still confused about?

- Create a question you think the instructor might ask at the end of this microlecture and include what you believe to be the correct response.

Reading (Title, Author, Date)

- What was the topic of this reading?

- In your own words, explain what you learned in relation to the topic(s) we are studying in this module.

- What are you still confused about?

- Create a question you think the instructor might ask at the end of this reading and include what you believe to be an appropriate response.

Module Resources

Use the space below to keep track of any additional resources provided in the module that helped you to better understand the learning objectives for this module. Specify where to find each resource and the specific information you found useful, so that you can refer to it later.

Resource title/location:
- Useful information in this resource
